

Founded in India in 1995, Suzlon is today among the globally leading manufacturers of wind turbines. Our wind turbines stand for ecological energy generation and high economic efficiency.

Our corporate communication is open, transparent, respectful and characterised by trust and cooperativeness. Do you want to work flexibly and self-motivated and continue your personal development? If yes, Suzlon is the right employer for you!

Health & Safety Engineer (m/f/d) – Ref.: 557

Your responsibilities:

- You take ownership of ensuring that health, safety, and environmental aspects are integrated from the very beginning of the design phase (“Safety by Design”).
- Risk identification and assessment are part of your daily work, including the development of effective mitigation measures (e.g., HAZOP, FMEA).
- Ensuring compliance with international standards, regulations, and legal requirements (IEC, ISO, EN, OSHA) is one of your key tasks.
- You support and supervise testing and validation activities on prototypes and serial products, verifying that safety functions perform as intended.
- Working closely with colleagues from design, quality, project management, and production, you bring safety considerations into every stage of the project.
- With a keen eye for detail, you analyze incidents and near misses, derive lessons learned, and initiate continuous improvement measures.
- You also advise and train teams on HSE requirements, promoting a strong safety culture within the organization

Your Profile:

- You hold a degree in engineering – for example, in mechanical, electrical, or safety engineering – or have an equivalent qualification.
- Several years of professional experience in Health, Safety & Environment, ideally within the development or design of complex technical systems, make you confident in this field.
- You are well-versed in relevant HSE standards and regulations (e.g., IEC, ISO, EN, ISO 45001) and know how to apply them effectively in practice.
- Conducting and evaluating risk analyses and safety assessments is part of your expertise.
- You thrive in international, cross-functional teams and communicate fluently in both English and German.
- A structured, solution-oriented way of working and a strong sense of responsibility characterize you.
- You are willing to travel and are passionate about contributing to safer and more sustainable wind energy technology

You will have the opportunity to drive forward innovative projects in a future-oriented company and contribute to the energy transition. In addition to an attractive salary, we offer you flexible working hours, a flextime account and working from home options. If the above skills and experience suit you, send us your application with the reference number (557) to career@suzlon.com
