

Founded in India in 1995, Suzlon is today among the globally leading manufacturers of wind turbines. Our wind turbines stand for ecological energy generation and high economic efficiency.

Our corporate communication is open, transparent, respectful and characterised by trust and cooperativeness. Do you want to work flexibly and self-motivated and continue your personal development? If yes, Suzlon is the right employer for you!

## SCADA Software Engineer (m/f/d)

Ref 571

Our Team in Rostock is looking for a new colleague!

### Your responsibilities:

- Develop new features for our in-house SCADA, service and maintenance software
- Design and specify software solutions based on functional and technical requirements
- Implement high-quality, maintainable code across backend and frontend components
- Develop and improve our internal tools and engineering utilities
- Perform software testing (unit, integration, system tests)
- Collaborate in agile, cross-functional development teams
- Use and maintain of our build pipeline and version control system to ensure high quality and reliability
- Second-level customer support

### Your profile:

- You have a master's degree in computer science, Software Engineering or a comparable field
- Solid experience in professional software development and testing
- Profound understanding of object-oriented programming and modeling
- Strong knowledge of programming languages (Typescript, Java, C++)
- optional experience with OSGi, EMF, RCP, Jenkins, Git, React, Uno Platform
- You have a passion for high-quality, reliable and maintainable code
- You are able to work independently in a structured and proactive manner, taking ownership of tasks and finding solutions
- You communicate clearly and effectively and feel comfortable in an international, intercultural team environment

You will have the opportunity to drive forward innovative projects in a future-oriented company and contribute to the energy transition. In addition to an attractive salary, we offer you flexible working hours, a flextime account and working from home options. If the above skills and experience suit you, then we look forward to getting to know you. Please send us your application with the **reference number (571)** to [career@suzlon.com](mailto:career@suzlon.com)
