

Founded in India in 1995, Suzlon is today among the globally leading manufacturers of wind turbines. Our wind turbines stand for ecological energy generation and high economic efficiency.

Our corporate communication is open, transparent, respectful and characterised by trust and cooperativeness. Do you want to work flexibly and self-motivated and continue your personal development? If yes, Suzlon is the right employer for you!

Technical Project Manager: Main Bearing Specialist (m/f/d) – Ref. 574

Your tasks:

- **Lead cross-functional development of mechanical wind turbine drivetrain components** using a systems thinking approach to align engineering, technical, design, and supplier activities for optimal results
- **Be the main technical link:** Take full ownership of coordinating between main bearing suppliers and the turbine drivetrain team from technical reviews to testing and serial release
- **From concept to completion:** Proactively identify and resolve technical or quality challenges for continuous improvement and timely deliverables
- **Manage and oversee the review process of bearing design requirements, calculations, and validation strategies,** ensuring compliance with specifications, industry standards, and long-term reliability targets
- **Maintain clear technical and project transparency** through detailed documentation, technical reports, progress updates, and final project assessments
- **Collaborate across international, cross-functional engineering teams** to continuously improve main bearing solutions with measurable impact on performance, reliability, and lifecycle cost
- **Monitor and analyse market trends** and technological developments in the field to drive innovation

Your profile:

- You have a degree in mechanical engineering or a related field combined with at least 5 years of proven technical expertise of main bearings and their integration in wind turbine drivetrains
- Equipped with several years of experiences in project and supplier management (proficient in relevant tools, software and platforms)
- Motivated and experienced in managing technical projects and connecting disciplines, using a systems-thinking approach to turn ideas into real solutions
- Critical thinker with a proactive mindset and willingness to challenge the status quo to drive improvement
- Able to thrive in dynamic settings while keeping priorities clear
- Confident, self-motivated, and communicative team player, able to work independently and collaborate effectively
- Capable to interact in English and enjoy working with international colleagues and suppliers to achieve shared goals

If this opportunity resonates with your experience and ambitions, we are looking forward to your application. Please include the **reference number (574)** and send to career@suzlon.com
