

Founded in India in 1995, Suzlon is today among the globally leading manufacturers of wind turbines. Our wind turbines stand for ecological energy generation and high economic efficiency.

Our corporate communication is open, transparent, respectful and characterised by trust and cooperativeness. Do you want to work flexibly and self-motivated and continue your personal development? If yes, Suzlon is the right employer for you!

Technical Author (m/f/d)

Ref 563

Your responsibilities:

- You will create and maintain technical documentation for our wind turbines throughout their entire lifecycle – from transportation from factory, assembly, operation and maintenance to dismantling and recycling.
- To prepare technical content accurately and clearly, you will work closely with a wide range of departments – including development, design and service.
- You will research your projects carefully and independently as part of a motivated international team.
- You will structure the information in our editorial system (SCHEMA ST4) and further develop templates and technologies.
- With your flair for language and technology, you will communicate complex topics in a simple, confident and appealing way to different target groups. You will create and review technical illustrations in collaboration with the design department to make complex processes visually understandable.
- You are familiar with documentation standards and norms and are confident in their application and compliance.

Your profile:

- You have technical understanding – whether through study, training or practical experience (e.g. technical editing, electrical engineering, mechanical engineering, wind energy, aviation etc.)
- You enjoy working at the interface between technology and language and take pleasure in explaining complex topics clearly and practically.
- You have experience and interest in project management and content management systems and work in a structured and independent manner.
- Whether you are an experienced editor or a career changer with relevant experience, it is important that you have a passion for technology and clear communication.
- You have a good feel for language, layout and visualization – ideally complemented by basic knowledge of tools for terminology, illustration or content management.
- You are familiar with common standards, guidelines and processes in technical documentation or are willing to learn.
- International and cross-functional collaboration motivates you, and you communicate confidently in German and English.

You will have the opportunity to drive forward innovative projects in a future-oriented company and contribute to the energy transition. In addition to an attractive salary, we offer you flexible working hours, a flextime account and working from home options. If the above skills and experience suit you, then we look forward to getting to know you. Please send us your application with the **reference number (563)** to career@suzlon.com
